To the

Practitioners and Workers

in

Christian Science

throughout the world this book is

Most Lovingly Dedicated

Digitized by Google

THIS BOOK is published to show the material progress that is being made throughout the world in the erection of Christian Science Houses of Worship and to offer suggestions to architects and members of Church Building Committees who are looking forward to church building operations.

It presents a medium through which the Christian Science Church Homes of the world may be visited — in thought — homes in which the same identical sermon is given each Sunday by the impersonal pastors — the Bible and Science and Health with Key to the Scriptures.

L. M. HOLT.

Los Angeles, California, August 9, 1909.

FIRST CHURCH OF CHRIST, SCIENTIST

COLORADO SPRINGS, COLORADO

Location—Corner of Boulder Street and North Nevada Avenue.
Size of Lot—125x190 feet.
Cost of Lot—$15,000.
Cost of Church Building—$15,658, including seats, but excluding Organ.
Material and Finish—Gray Manganese Brick and Cement Block Trimmings.
When Built—1907.
Seating Capacity—391.
Seating Capacity of Reading Room—40.
Architect—S. S. Beman, Chicago, Ill.

Digitized by Google

FIRST CHURCH OF CHRIST, SCIENTIST

COLORADO SPRINGS, COLORADO

THE AUDITORIUM.

Note—The Church is built on rear 65 feet, leaving 125 feet square for future building. It is then to take the place ordinarily held by first floor of Church—that is, Sunday School Room, Reading and Committee Rooms. There is an extra large basement, and the flue has double capacity so that heating plant for new building can be installed in present building. Thus when present quarters are outgrown an auditorium can be built on the corner with no basement or first floor necessary. A church official writes: We thus save all loss on present building, at the same time having in the future the use of a smaller building for business meetings, etc. With two separate heating plants, either one or both of the buildings can be heated to advantage.

FIRST CHURCH OF CHRIST, SCIENTIST

SYRACUSE, NEW YORK.

The Auditorium, showing the seating arrangement, the Readers' platform and the organ.

Location—704 East Fayette Street.

Seating Capacity—Normal, 300; when reading rooms are opened into the Auditorium, about 500 can be comfortably seated.

Note—The Church was organized in 1889 and was called "Syracuse Church of Christ." In 1898 a Colonial dwelling house was purchased and remodeled to seat about 100 in addition to the space used for the Reading rooms. July 20, 1898, the name was changed to First Church of Christ Scientist, of Syracuse, N. Y. In 1904 the present Auditorium was built, the portion of the old building remaining being devoted to Reading room purposes. The Church has invested about $16,000 in the property, which is free from debt.

INDEX

The illustrations in this book are arranged in the following order:

First—Frontispiece—The Mother Church—Temple Extension (in colors.)

Second—Views of The Mother Church.

Third—Views of churches in the United States. The views in each church are given under their appropriate State headings. The States are arranged in alphabetical order. The cities and towns in each State are also arranged in alphabetical order, and the churches in each city are arranged in numerical order. Views of churches in Canada, England and Germany follow those in the United States.

Christian Science Church Architecture

OR

Church Homes of Christian Scientists

By L. M. Holt.

This book in a way is a novelty.

There is no similar publication in connection with this or any other religious denomination in the world, so far as known to the author.

This book has three missions to fill:

First—To show the world the wonderful growth of Christian Science.

Second—To offer suggestions to architects and church building committees.

Third—To interest those who are being attracted to the great physical healing work being done through Christian Science.

This work was not commenced until a careful study of the subject had been made, and prominent workers in Christian Science had been consulted.

The book is not an architectural work—technically speaking,—but a collection of exterior and interior views of Christian Science Churches.

The large number of subscriptions to the book in advance of its publication from Christian Science practitioners and other workers, and the words of encouragement found in the letters accompanying such subscriptions are accepted as an appreciation of the efforts of the author in the work herein outlined.

Price of the book, $3.00 bound in cloth, and $5.00 bound in morocco. Remittances should be mailed to the following address:

L. M. HOLT,
1049 West 21st St.,
Los Angeles, California, U. S. A.
